

School Safety with Lockdown Alerts and Incident Communication

Cosafe helps schools and Multi-Academy Trusts (MATs) across the UK implement their emergency action plans, delivering alarms and messages to any device, providing information to staff, coordinating responses and ensuring Martyn's Law Compliance.

Prepare Your School for Martyn's Law

Martyn's Law mandates actionable plans for four critical responses. Replace your paper policies with a one-touch school incident alert system that staff can actually use when seconds count.

The Four Public Protection Procedures for School Safety

Evacuation

Safely and swiftly move staff and students away from school threats.

Invacuation

Instantly direct your school to move internally to secure, pre-defined safe zones.

Lockdown

Secure your entire school site immediately to protect against external or internal risks.

Communication

Broadcast clear, real-time crisis updates to the right people, exactly when it matters.

Manage Any Type of School Incident

School incidents are never one-size-fits-all. Schools face a wide spectrum of threats, including severe weather, medical emergencies (**Benedict's Law**), intruders and even violent or intimidating pupil behaviour.

Because emergencies present themselves in so many unpredictable ways relying on disjointed or outdated alerting or communication methods is no longer a viable safety strategy.

School Safety Is More Than Raising the Alarm

Cosafe is more than a “lockdown alert tool” It provides a suite of features to aid in “Staff Safety” which help schools manage every day scenarios from many types of incidents.

Features Include:

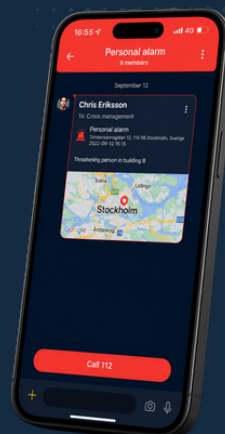

Lone Worker Safety

Under the Health and Safety at Work Act, schools have a strict duty of care to manage the risks associated with staff working alone, whether they are on campus out-of-hours or conducting offsite visits.

Cosafe's integrated lone worker feature provides robust safeguarding for both teaching and operational staff directly through their existing mobile devices.

Staff Panic Alarm Button

Elevate Staff safety with Cosafe's Panic Button. Offering continuous staff protection anywhere from isolated classrooms to offsite trips or student visits.

In a crisis, a staff member can trigger a discreet safety alarm, instantly transmitting their precise GPS location to your school's SLT or select group of people.

Cosafe is a market-leading platform for critical communication and incident management in the public sector, schools and businesses. With Cosafe's user-friendly security app, you get an effective solution for preventing, alerting and managing incidents.

Protecting over one million students, Cosafe is tried and tested from the smallest schools through to large local authorities.
